

The state-of-the-art EA31 is designed to give top performance and achieve high levels of efficiency thanks to optimised hydraulic systems and motors.

The pump is fitted with a magnetic float switch with variable level control and maximum travel stop. A locking disk enables straightforward adaption of the pump to external control systems.

Supplied free standing for quick installation.

WASTE TYPE

This pump is not suitable for foul waste. Contact our Sales Team for advice on a suitable pump for foul water.

KEY FEATURES

- Pump and discharge casings in GRP. Casing cover and impellor in noryl. Motor housing and shaft in nickel steel. Float switch in polypropylene
- Vortex hydraulics for blockage free pumping in critical applications
- Available with float locking disk for manual level control
- Internal thermal protection

PUMP SPECIFICATIONS

Number of pumps	One
Impellor type	Vortex
Control	Automatic
Power supply	230 VAC
Rated current	1.9 A
Motor rating (P2)	180 W
Discharge size	1¼"
Free passage	10 mm
Max. vertical output	6.8 m
Max. flow rate	2.9 l/s
Max liquid temp.	<40 °C
Cable length	10 m
Weight	5.2 kg
Dimensions H/W/L	321 / 190 / 332 mm
