

SumpFlush 800-1750

Part Code 106976

A fully automatic wastewater pumping system suitable for pumping surface and/or groundwater to a higher level when gravity drainage is not possible and/or economical to install.

The system provides up to 575 litre storage capacity depending inlet depth. It can accept waste from car parks, car washes, floor areas, down pipes, cavity membrane systems or similar.

The system consists of a polyethylene tank, Class E PVC internal pipework with brass valves, one automatic wastewater submersible pump and a solid top, locking, galvanised steel access cover (FACTA A).

It discharges to solvent welded 11/4" Class E PVC. Optional discharge reducer kits can increase external discharge diameter to 1/2" or 2" to reduce friction loss. Compression fittings are also available for discharging to MDPE pipework.

It is easy to install as inlets can be positioned to your site's requirements. Inlet information to be supplied at time of order, or can be drilled on site.

For groundwater and surface water applications where inflow cannot be controlled, twin pump systems complete with a high level alarm and battery backup system should be used, in accordance with BS 8102:2022 and PCA Guidelines. High level alarms and battery backup systems can be purchased to your specification.

KEY FEATURES

- · Vortex impellor for high flow rates
- Up to 575 litres storage capacity
- · Compact chamber for limited space installations
- · Ideal for an extension, outbuilding, basement or similar
- 600 mm x 450 mm clear opening
- Variable inlet positions to suit site
- · A range of battery backup systems are available
- A range of alarms and remote alerts are available
- Quick and simple to install

WASTE TYPE

Ground Surface Grey Storm

This system is not suitable for receiving foul waste. Contact our Sales Team for advice on a suitable foul water packaged pumping stations for your property.

Part Code 106976

EXAMPLE INSTALLATION

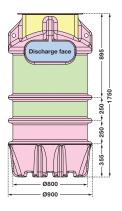

Chamber illustrated is 800 mm x 1250 mm.

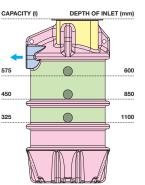

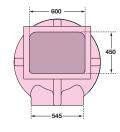

A Float bracket for optional high level alarm mini float.

- B 110 mm inlet positioned to site requirements.
- **C** Brass swing check valve.
- D 110 mm inlet positioned to site requirements (additional inlets available).
- E Structurally-reinforced virgin tank-grade polyethylene chamber.
- F Galvanised steel, solid top, locking, access cover, PP frame, FACTA A.
- G 50 mm cable duct positioned to site requirements.
- H Brass gate valve.
- I 1¼" Class E PVC plain female discharge for solvent welding to high pressure PVC.
- J 1¼" Class E PVC pipework.
- K 240 V automatic submersible pump.

CHAMBER DIMENSIONS

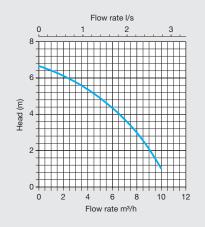

PUMP SPECIFICATIONS

Number of pumps	One	
Impellor type	Vortex	
Control	Automatic	
Power supply	230 VAC	
Rated current	1.9 A	
Motor rating (P2)	180 W	
Discharge size	1¼″	
Free passage	10 mm	
Max. vertical output	6.8 m	
Max. flow rate	2.9 I/s	
Max liquid temp.	<40 °C	
Cable length	5 m	
Weight	5.2 kg	

CHAMBER SPECIFICATIONS

Internal pipework	1¼" OD Class E PVC	
Discharge pipework	1¼" OD Class E PVC	
Lifting eyes	4 no	
Max. storage capacity	575 litres	
Chamber material	Tank-grade polyethylene	
Dimensions (Ø x H)	900 x 1750 mm	
Clear opening	600 x 450 mm	

Permitted connection positions

Capacities indicative from lowest inlet invert.

Discharge	Inlet location	Cable ducts and	No drilling
only	allowed	vents only	allowed
